# Lietuvių Flashcards

*Lithuanian from zero, drawn as a civil-defence manual of a free Lithuania, 1981*

An Anki deck for learners of Lithuanian, from the first word to A2. Every card is a plate in a training manual that never existed: brush-ink outlines, matte gouache, cream paper, a red band with the chapter in Lithuanian and the plate number.

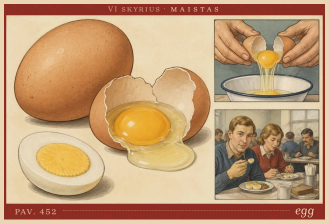

The A1 subdeck has 1,191 cards: 687 pictures, 135 phrases, 334 cloze sentences and 35 sentence cards, in the order of usefulness. Stress marks are sourced, never guessed. 547 cards already carry recordings by a native speaker.

The following pages show a selection, front and back.
